

Tobiasz Lubowski

KEY ACCOUNT MANAGER TEAM LEAD | IMPLEMENTATION ENGINEER | JUNIOR DEVOPS

+48 666 372 754 | lubowskitobiasz.kontakt@gmail.com | Wrocław

----- PROFESSIONAL SUMMARY -----

IT specialist with over 4 years of experience in delivering and managing IT solutions for major clients in logistics, healthcare, finance, and public sector.

Skilled in technical implementation, automation, DevOps, and client support. I believe that continuous development is crucial, which is why I love learning new technologies and enjoy turning theory into practice.

----- SKILLS AND AREAS OF EXPERTISE -----

KEY SKILLS

Project and client management (end-to-end). · Technical implementations (video chat, voicebot, contact center solutions). · DevOps (Docker, Kubernetes, Terraform, CI/CD, GitLab). · System integration, automation, scripting, Strong communication and relationship-building. · Data analysis, troubleshooting, process optimization.

TECHNICAL SKILLS

AWS · Azure · Google Cloud Platform · Azure DevOps & CI/CD · Bicep (Azure IaC) · ZeroTier · Docker · Kubernetes · Terraform · Ansible · GitLab CI/CD · Azure DevOps Pipelines · Git & GitHub & GitLab · Linux · Windows Server · NGINX · Zabbix · JasperReports · PostgreSQL · Python · Flask · API

LANGUAGES

English level- **B2+** · Polish - Native

----- PROFESSIONAL EXPERIENCE -----

04.2021 – 07.2025

Key Account Manager Team Lead / Key Account Manager - Alfavox (Poznań)

Managed IT projects for leading clients, including a nationwide logistics company, large private healthcare networks, top banks, and public sector institutions. Supported clients from the first presentation, through project planning and technical implementation, to successful closure.

- Coordinated integration of new solutions (video chat, voicebot, contact center) with client teams and IT engineers. Built long-term relationships and ensured high satisfaction and contract renewal. Support & Incident Management
- Served as SLA Manager: oversaw client tasks, planned support resources, and handled escalations.
- Delivered technical documentation and presentations as Presales Consultant. Led deployment and updates of critical systems without major incidents.
- Configured Dockerfiles to deploy complex systems reliably.

Implementation Engineer - Alfavox

- Deployed Contact Center platforms using Docker containers and configured HA environments.
- Deployment of environments for an enterprise employing over 18,000 people.
- Analyzed and resolved VoIP connectivity issues, improving call quality and uptime.
- Wrote Bash scripts to automate data archiving and cleanup tasks.
- Created custom aggregation functions in PostgreSQL to support data analytics.
- Updated client environments using Ansible playbooks for consistent, repeatable changes, reducing configuration time by 40%.
- Built CI pipelines that schedule cron jobs and set file permissions for admin users.
- Provisioned EC2 test instances via Terraform deployments for scalable infrastructure testing.

Support Specialist - Alfavox

- Provided technical support for users and system administrators. Maintained SLA targets (99%+ on-time ticket resolution). Worked closely with engineering and QA teams.
- Solved over 600 support tickets per year with a 97% satisfaction rate (SLA >99%, average first response under 2 hours).

Software Tester - Alfavox

- Tested new features and use cases to make sure they matched client requirements. Wrote and executed test cases, reported and tracked issues. Verified solutions directly with clients to ensure business goals were met.

----- PRIVATE PROJECTS & PRACTICAL LEARNING -----

CI/CD and Terraform Project: Designed a DevOps demo app with FastAPI backend, Docker, GitLab CI/CD, and Terraform on AWS — built to learn cloud automation, deployment pipelines, and infrastructure as code.

IoT Data Bridge: A Bash CLI tool was co-developed for an MQTT data converter project, enabling dynamic device initialization, producer-specific configurations, and seamless translator swapping. This work enhanced scripting skills and understanding of IoT data workflows, demonstrating the ability to automate complex data-pipeline tasks - to learn IoT protocols and Python scripting in real hardware projects.

Automated Azure Infrastructure with Zabbix Monitoring (Terraform IaC): Terraform configuration for provisioning Microsoft Azure infrastructure with Zabbix monitoring, networking, and modular IaC deployment, created to practice and learn these technologies.

Integration with GCP: Created a Python script on Google Cloud Run to sync tasks from Zendesk to Pipedrive using API. If a task was new in Zendesk, it was added to Pipedrive. Credentials were managed in Google Cloud Secret Manager. Purpose: learn Python automation, APIs, and serverless on Google Cloud..

----- EDUCATION & CERTIFICATES -----

Bachelor of Engineering degree - specialization in Programming - Wroclaw University of Applied Informatics

ITIL 4 Foundation Certificate

----- PROFESSIONAL VALUES -----

I value learning by doing: I focus on practical projects and self-study. I am curious about new technologies and solutions that solve real problems. For me, continuous improvement is about testing new tools and approaches, not just reading theory.

----- DATA PROTECTION CLAUSE (GDPR/RODO) -----

I hereby give my consent for the processing of my personal data included in this application for the purposes of the recruitment process, in accordance with the Act of 10 May 2018 on the Protection of Personal Data (Dz. U. 2018 poz. 1000) and Regulation (EU) 2016/679 of the European Parliament and of the Council (GDPR).
